

# FILE ARTWORK SPECIFICATIONS CHECKLIST

**TAILOR MADE**  
PACKAGING

**Please ensure that the artwork file you provide is correctly setup to avoid any print issues or delays with your order.**

## FILE FORMAT

File to be supplied in High Res PDF format only

## COLOUR

All files to be supplied in CMYK process colours. (RGB or Pantone will not be accepted) Ensure your file specifies the correct pantone colour name (eg PMS 206C) so correct colour is used.

## SCALE & RESOLUTION

Please ensure artwork is set to the correct size.

Print resolution 300dpi

Scans/Images/Rasterised Files supplied full size 300dpi and linked images must be no larger than 100% with no LWZ compression.

## BLEED

Ensure a 3-5mm bleed is included in your artwork and trim marks to be supplied in the file.

## FONTS

All fonts to be embedded or set to outlines (Preferred)

## DIECUTTING

If your job requires diecutting, a knifeline is required clearly showing where the job is to be cut. Knifelines/Crease lines/Fold lines must be supplied as a spot colour and set to overprint.

## SPOT VARNISHES

Please supply any spot varnish areas as a spot colour clearly marked as a spot UV (varnish) and overlaid in correct position.

## FILE DELIVERY

We will provide you a client Google Drive folder to upload your artwork. Alternatively you are welcome to share dropbox, hightail etc.
